High

Affected User

Alex Morgan

Domain

aklab.local

Issue:

Password Reset

Alex Morgan cannot sign in because he forgot his password. Reset his password with a temporary password, allowing him to change his password later.

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Issue Description

Alex Morgan cannot sign in because he forgot his password. Reset his password with a temporary password, allowing him to change his password later.d folder required for daily work.

2. Environment

- User account: AKLAB\alex.morgan
- Shared resource: \\DC01\CompanyShare\HelpDesk

3. Root Cause

The user forgot his password and now wants the password to be reset.

4. Resolution

Asking the user a screenshot as a proof:

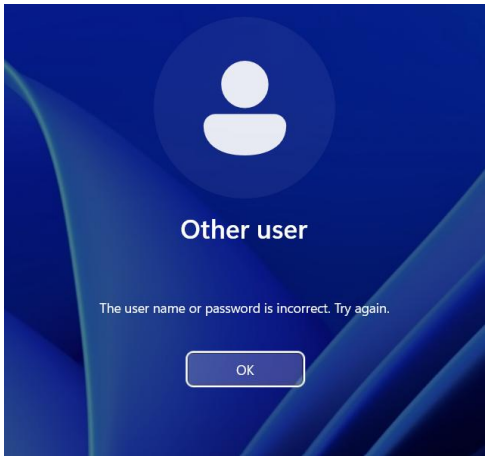

Figure 1: Alex Morgan is unable to log in

Verified the user first. The user verified successfully.

Resetting the password and providing a temporary password which the user will have to change:

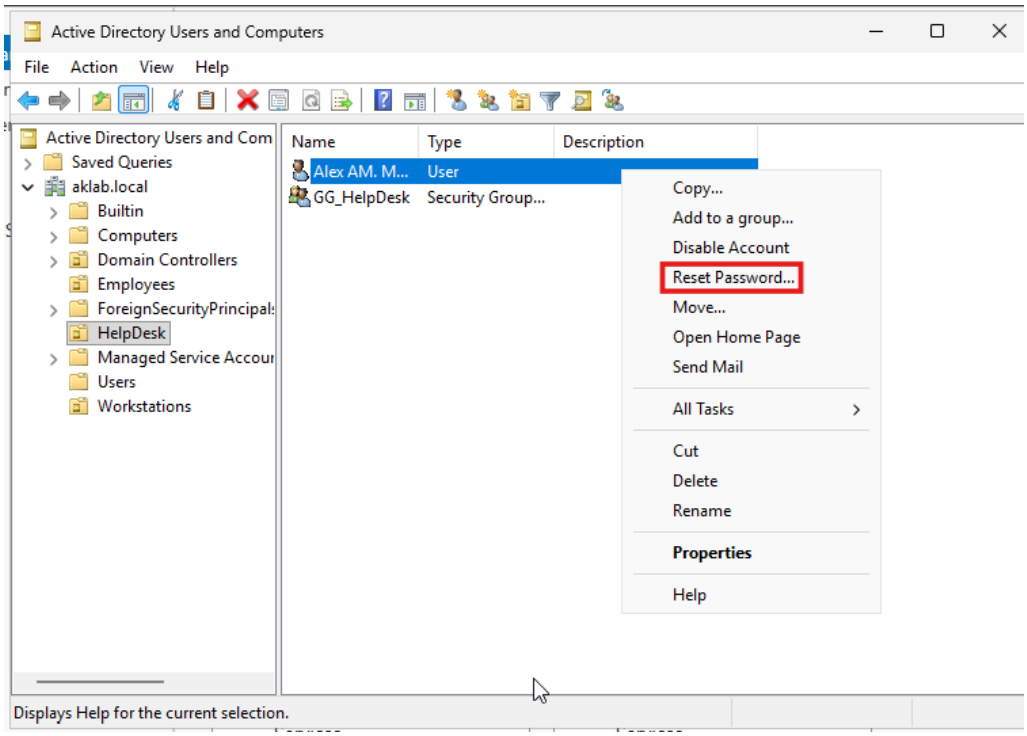

Figure 2: Resetting the password

Ensuring that the user will be able to change the password at the next logon.

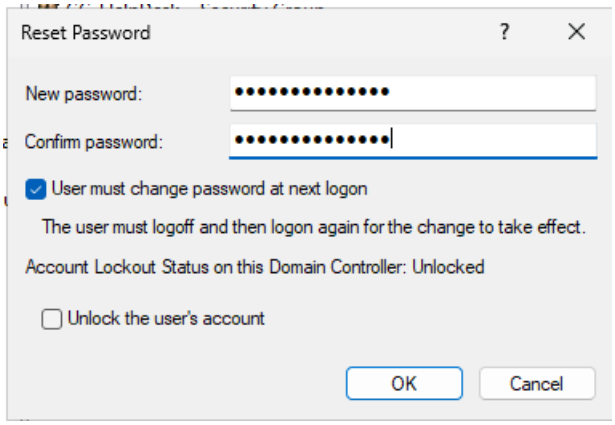

Figure 3: Ensuring that the user must change password at next logon

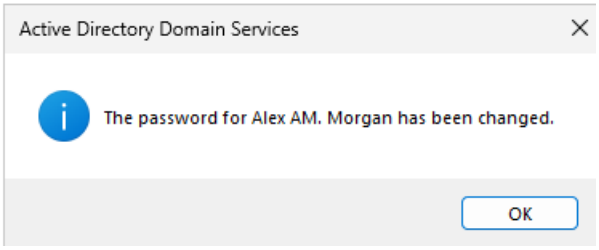

Figure 4: The password is changed successfully

5. Validation

Asked the user to login using the temporary password I sent, and the user gets this screen after he entered the password:

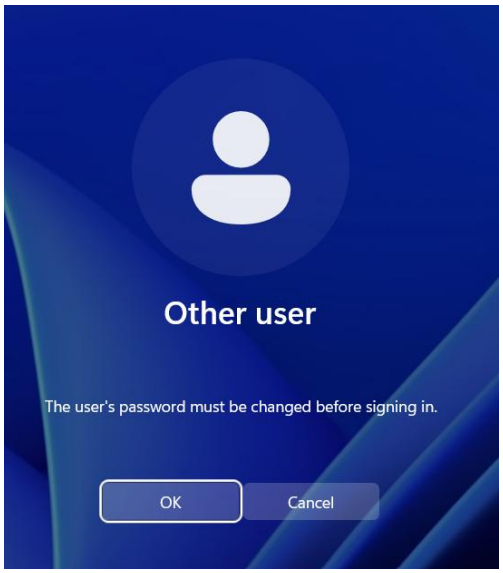

Figure 5: Change the password request at the logon

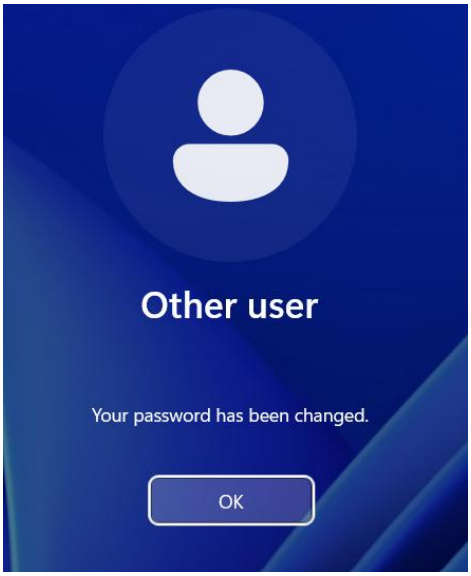

Figure 6: The user has successfully changed the password

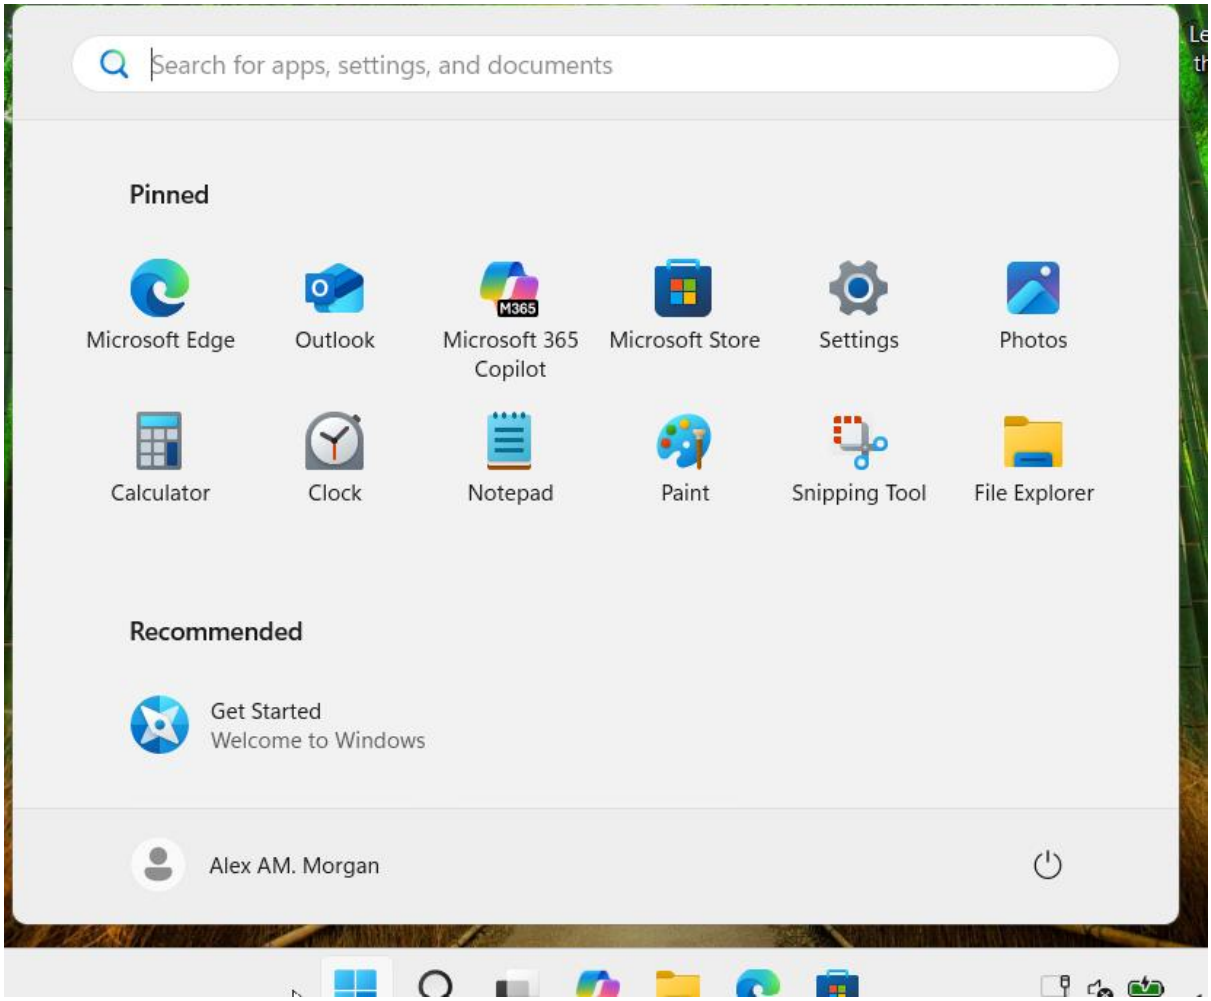

Figure 7: The user has successfully logged in to the account
