Security Issue

Domain

aklab.local

Issue:

Unauthorized Shared Folder Access

Alex Morgan, a member of the GG_HelpDesk security group, could access the Employees shared folder even though access should have been restricted to the Employees department.

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Issue Description

Alex Morgan, a member of the GG_HelpDesk security group, could access the Employees shared folder even though access should have been restricted to the Employees department.

2. Environment

- User account: AKLAB\alex.morgan
- Shared resource: \\DC01\CompanyShare\HelpDesk

3. Investigation

As verified by the user.

4. Root Cause

Some permissions and configurations need checking.

5. Resolution

Making changes to the Advanced Security Settings for HelpDesk.

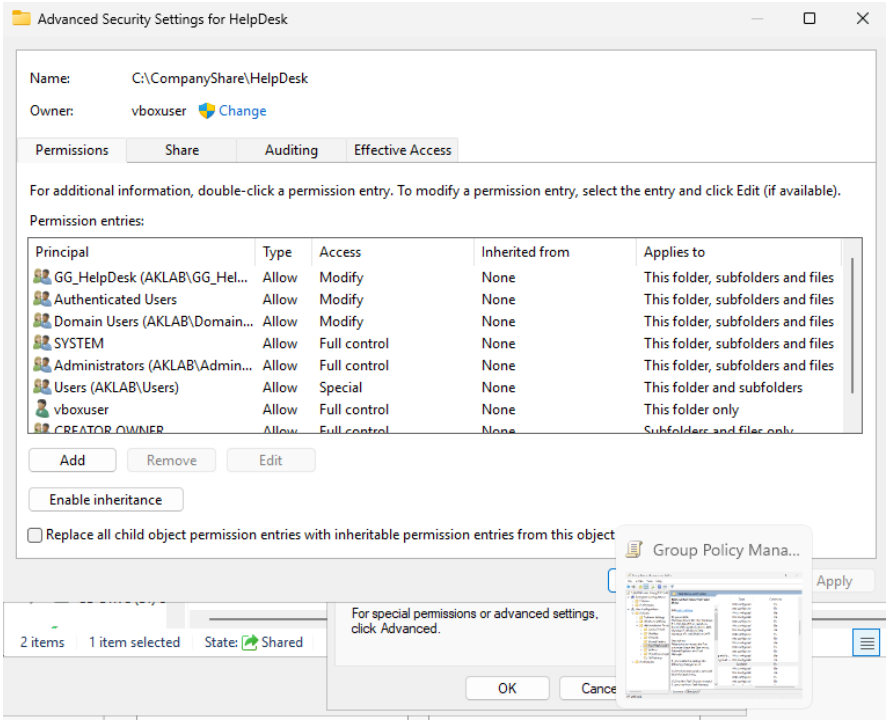

Figure 1: Advanced Security Settings for HelpDesk

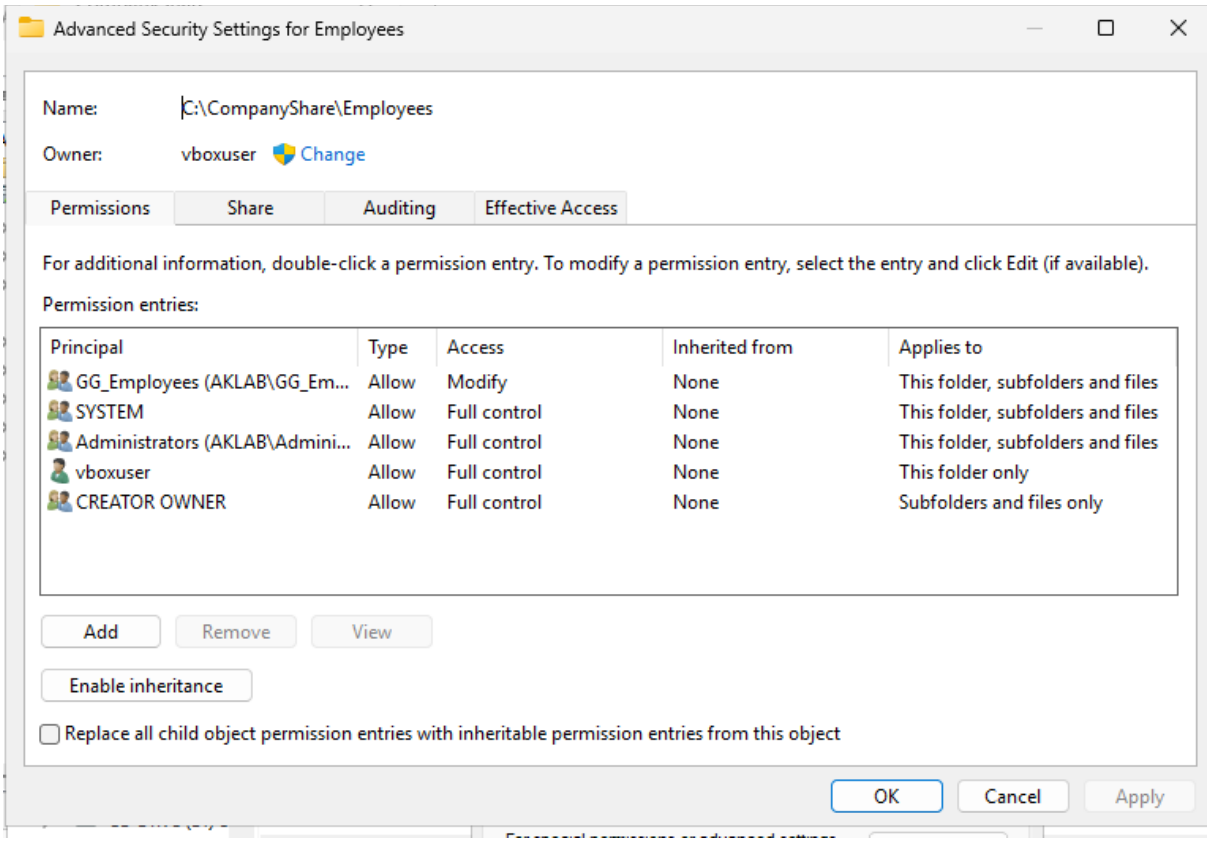

Figure 2: Advanced Security Settings after applying changes

6. Validation

Verifying the result remotely over Alex's desktop:

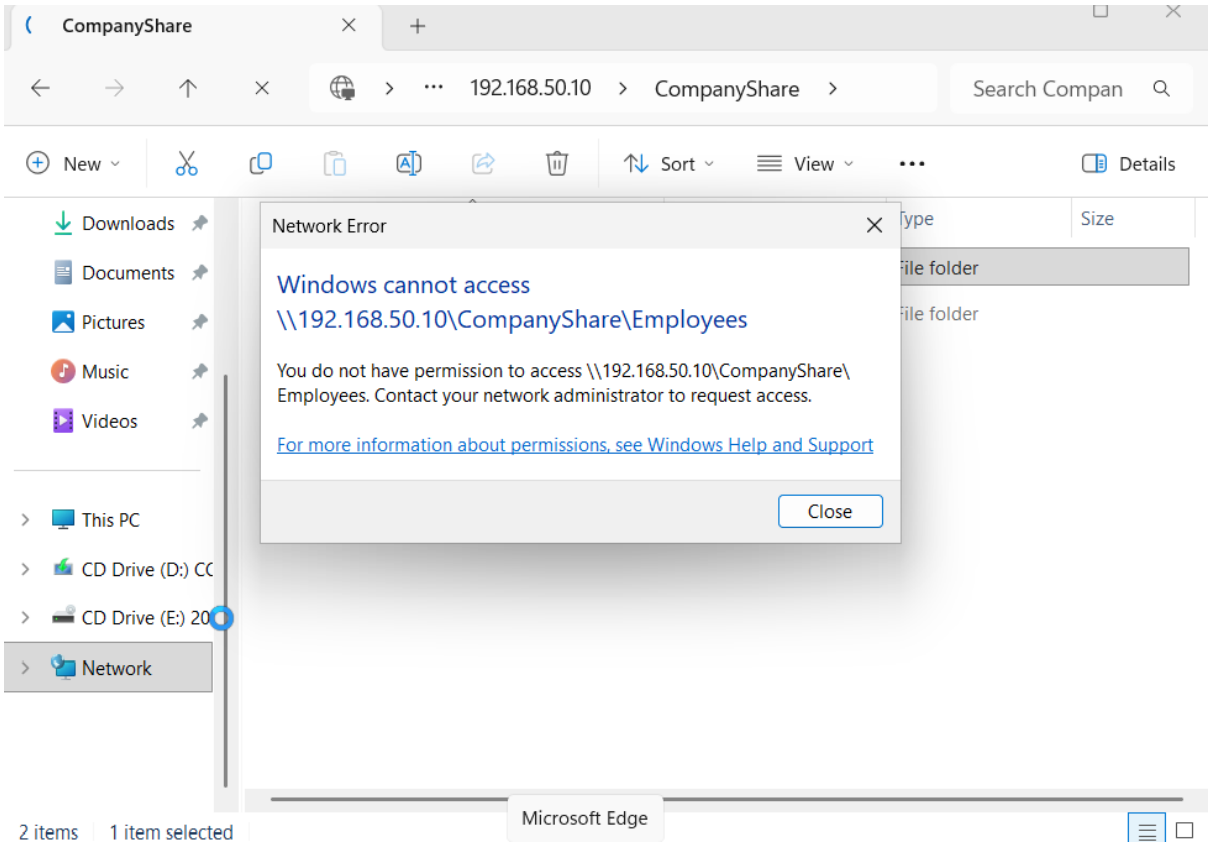

Figure 3: Access denied for Employees folder

Ticket Resolved!
