Service Requested:

Manager Folder Access Request

Request Summary:

John Reed has requested access to a new Management shared folder for storing and accessing management-related documents.

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Service Requested

Create a Management folder under C:\CompanyShare, configure the appropriate share and NTFS permissions, and grant access to authorized managers through the GG_Managers security group.

2. Environment

- User account: AKLAB\john.reed
- Shared resource: \\DC01\CompanyShare\Employees

3. Resolution

Creating a new folder names management inside the CompanyShare drive:

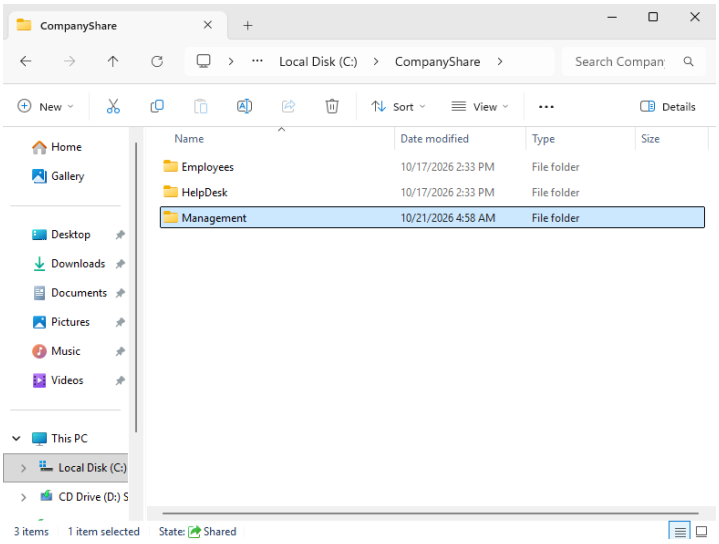

Figure 1: A new folder names Management is successfully created

Configuring the security of the folder by permitting and denying the necessary users:

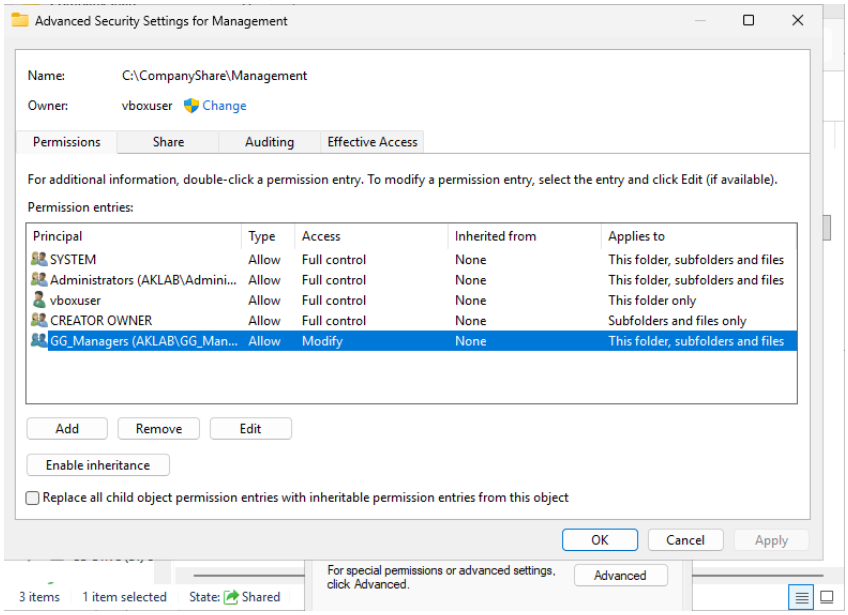

Figure 2: The security has been configured

4. Validation

Checking remotely from John Reed's desktop if the folder is visible:

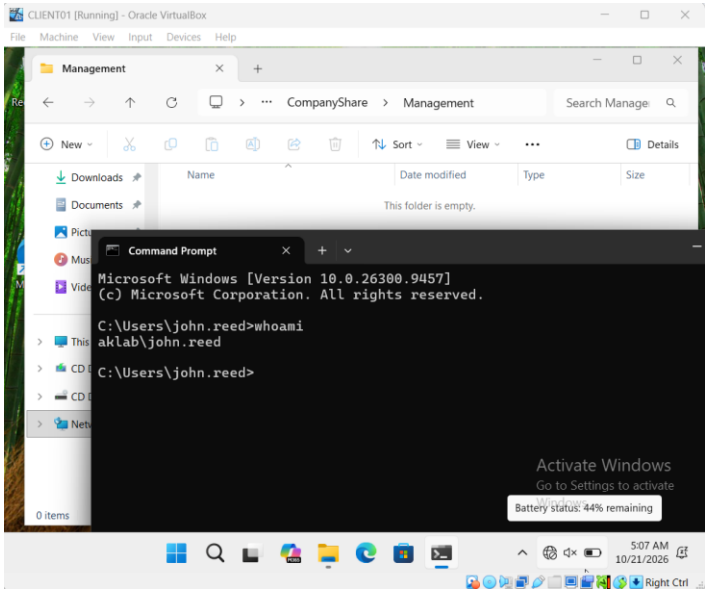

Figure 3: John Reed can successfully access the new Management folder

Ticket Resolved!
