Service Requested:

The company wants to hire a marketing team starting next week. Kindly set up the following:

1. Add the following employees in a separate unit named “Marketing”:

Employee 1) First Name: Olivia Last Name: Martin Username: olivia.martin@aklab.local Title: Marketing Associate

Employee 2) First Name: Ethan Last Name: Clark Username: ethan.clark@aklab.local Title: Marketing Associate

2) Create a folder and provide access to both employees

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Issue Description

Creating a new OU names “Marketing”, Add two employees as per the given details. Create a folder and assign access to them.

2. Environment

- User account: Create new accounts
- Shared resource: Should be: \\DC01\CompanyShare\Marketing

3. Resolution

Creating a new Organizational Unit:

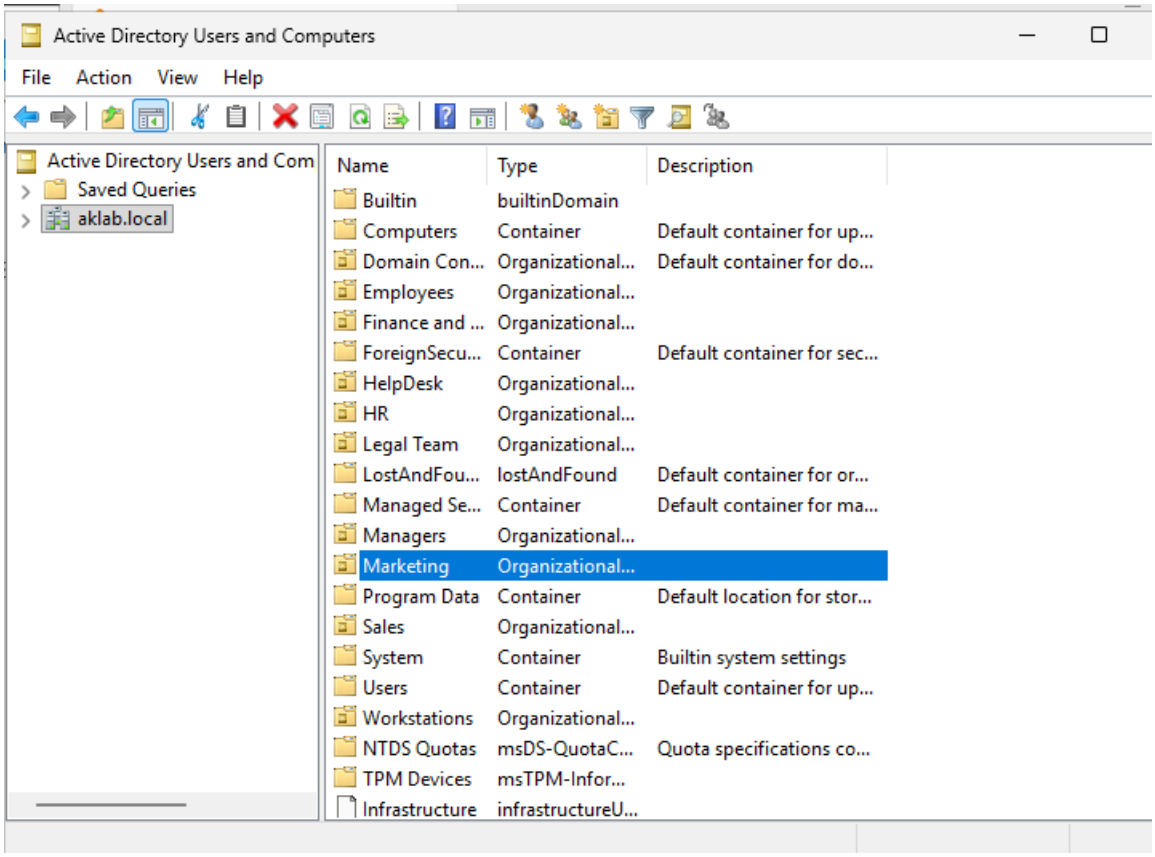

Figure 1: Marketing OU is created

Adding employees in this unit:

Inside Marketing folder > Right-click > New > User

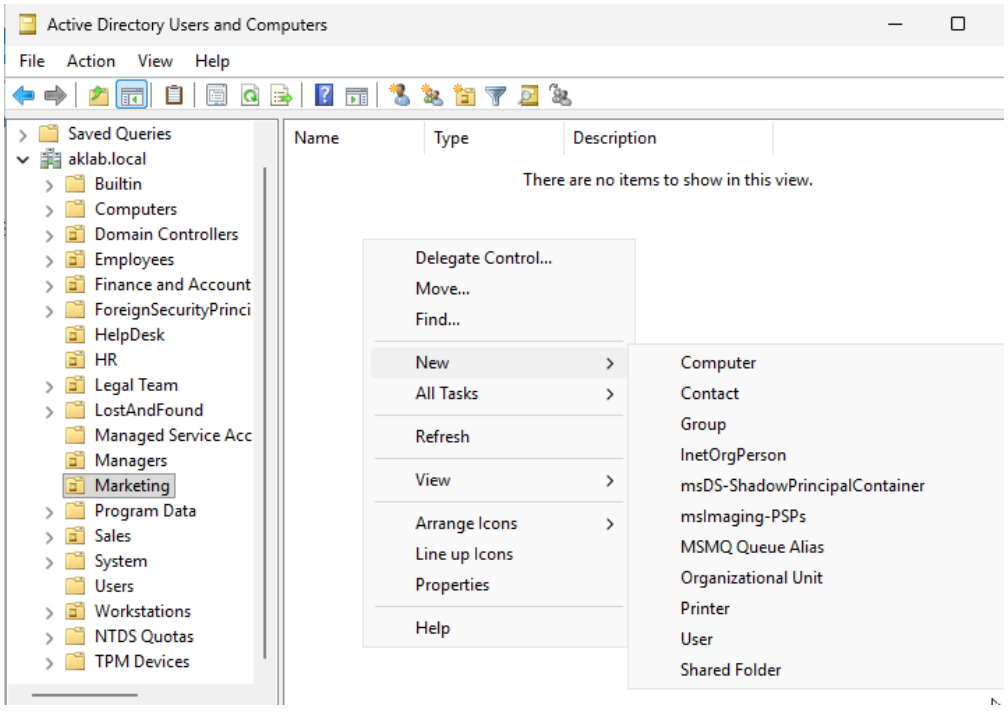

Figure 2: Adding new users

Adding both users:

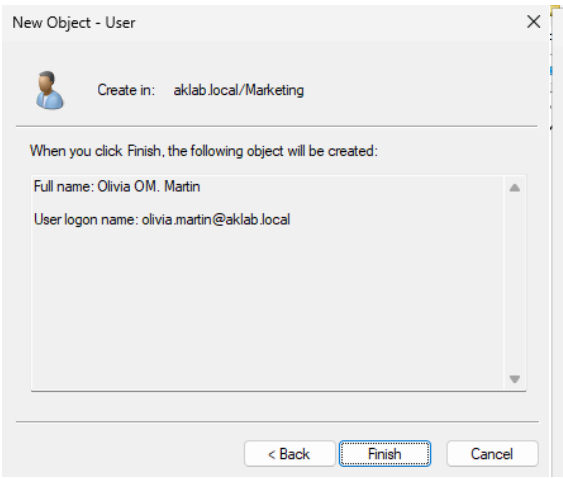

Figure 3: The first user is added

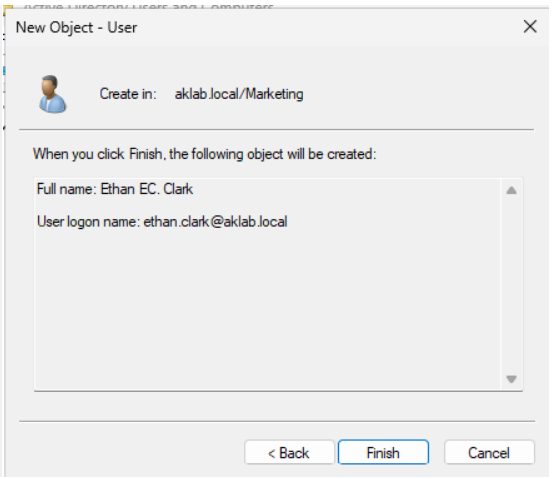

Figure 4: The second user is created

Assigning titles to both of them:

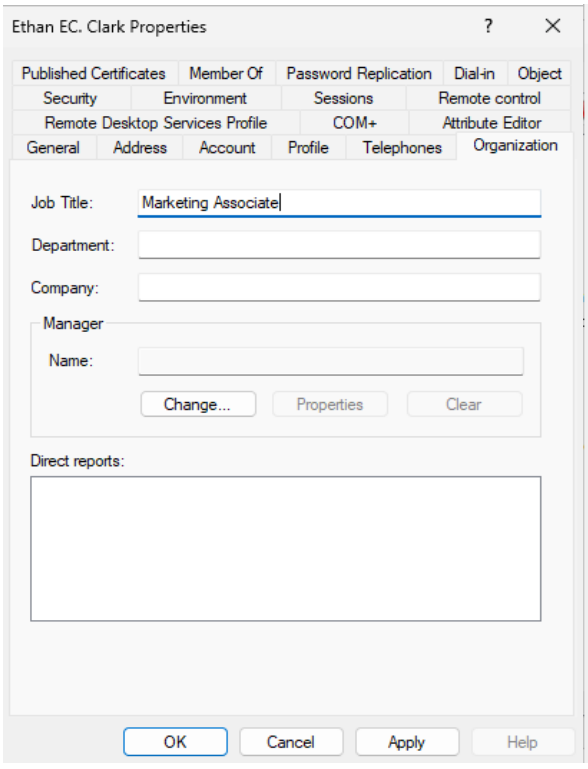

Figure 5: Assigning title to Olivia Martin

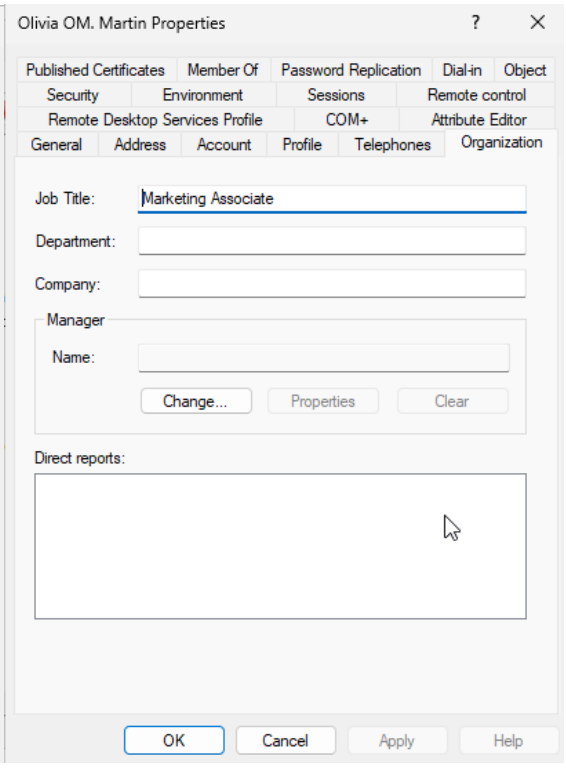

Figure 6: Assigning title to Ethan Clark

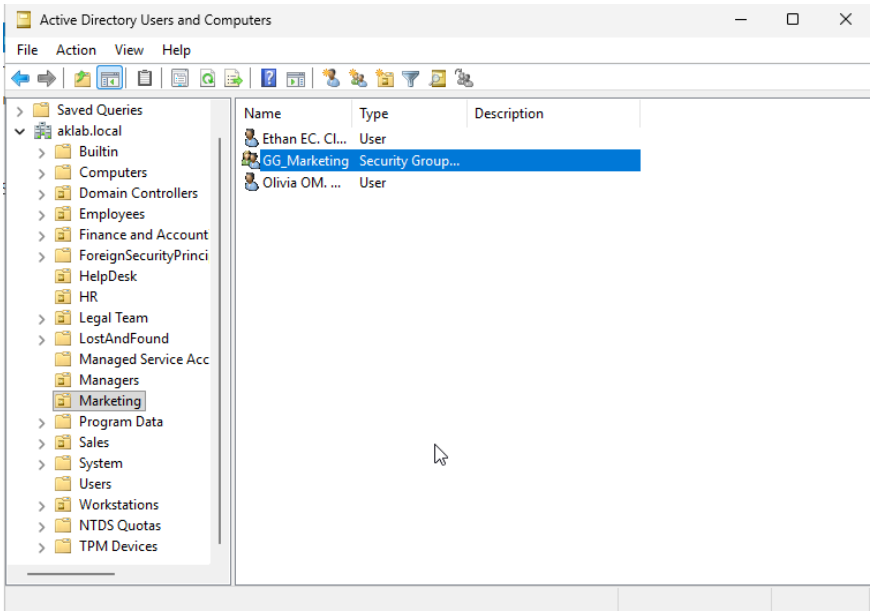

Figure 7: Adding a security group GG_Marketing to group the employees

Creating a folder named Marketing:

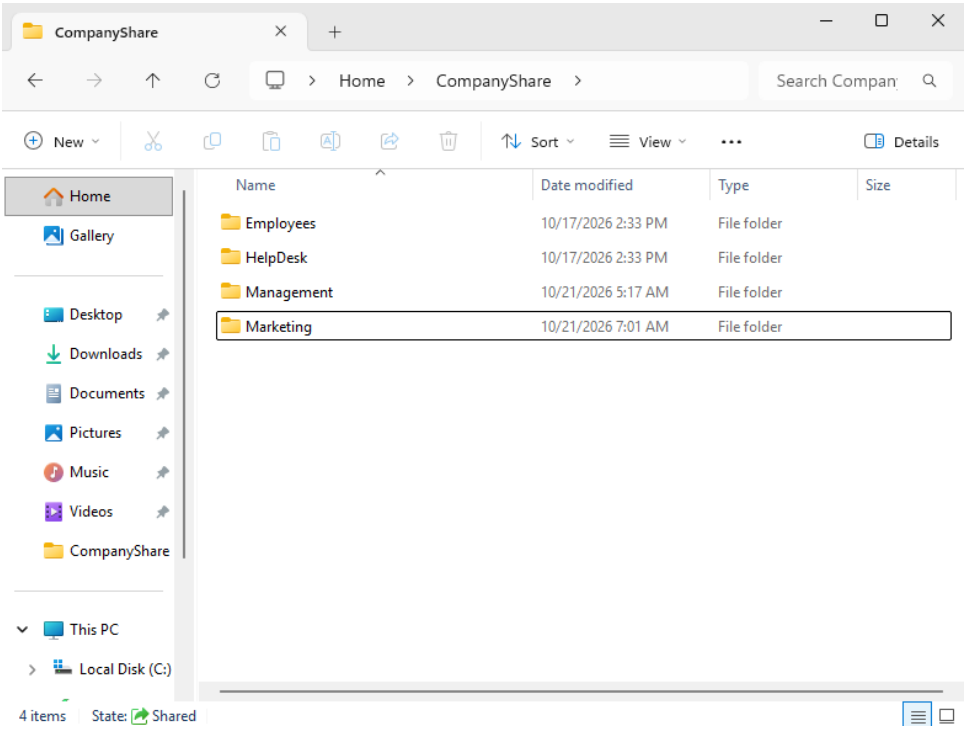

Figure 8: New folder "Marketing" is created

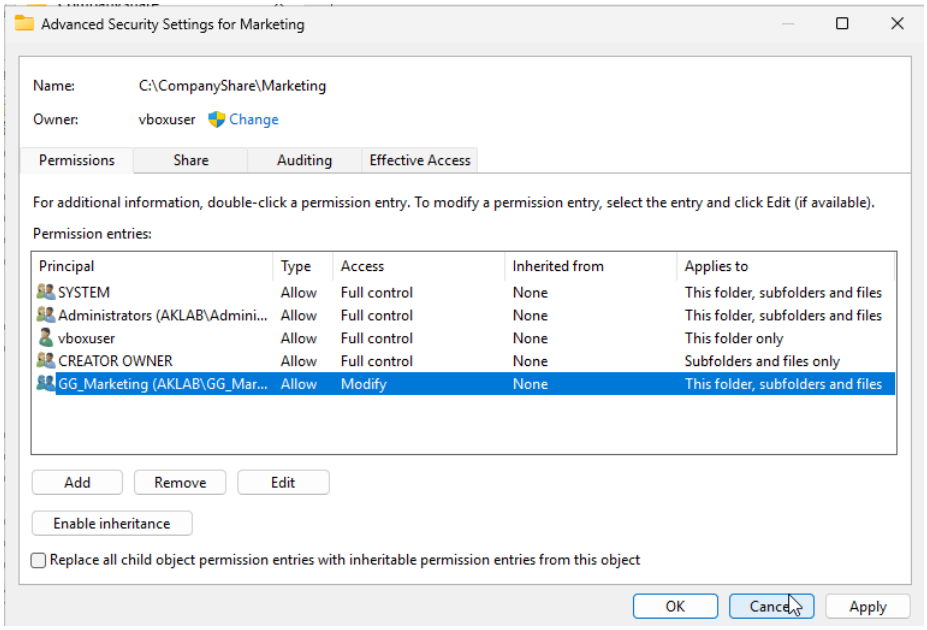

Figure 9: Configuring security settings and allowing GG_Marketing group to access the folder

6. Validation

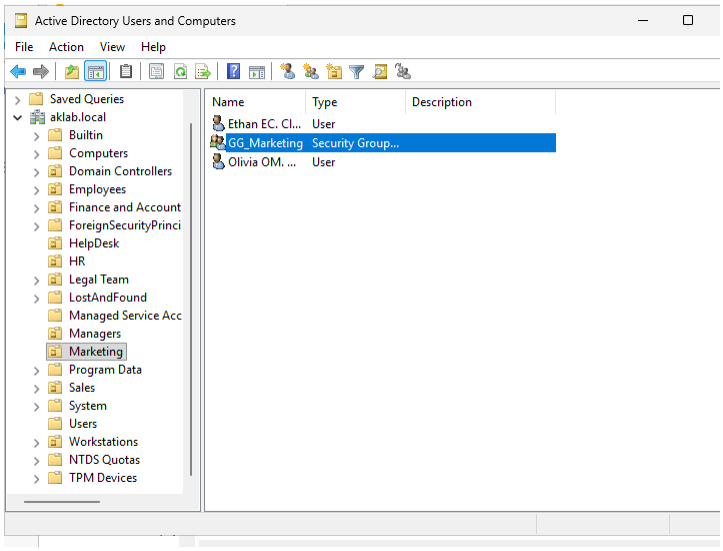

Figure 10: The users are listed

Ticket Resolved!
