Issue:

Requesting the offboarding of Noah Wilson, an employee in the Sales department. IT Support must revoke his access to organizational systems and resources in accordance with the approved employee departure process.
The offboarding process must protect company information, prevent unauthorized access after the effective departure time, and preserve business files that may be required by the organization.
Effective termination date: October 26, 2026

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Issue Description

The HR Department has requested the offboarding of Noah Wilson, an employee in the Sales department. IT Support must revoke his access to organizational systems and resources in accordance with the approved employee departure process.

The offboarding process must protect company information, prevent unauthorized access after the effective departure time, and preserve business files that may be required by the organization.

2. Environment

- User account: AKLAB\noah.wilson
- Shared resource: \\DC01\CompanyShare

3. Investigation

- Checking if Noah's account exists in the Active Directory:

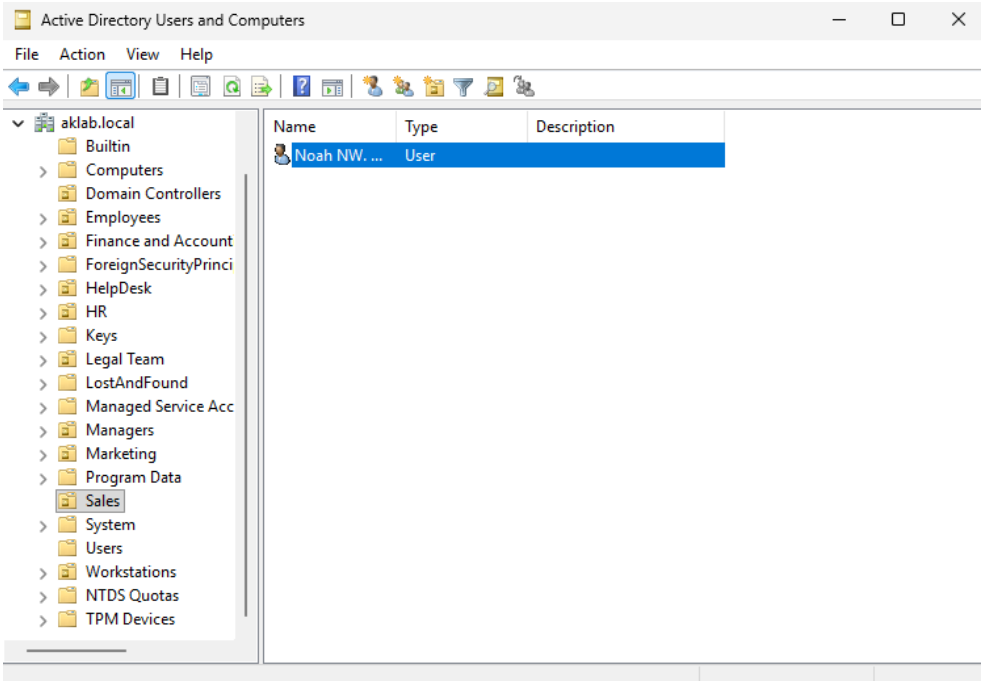

Figure 1: Noah Wilson's account exists in the Active Directory

4. Resolution

Checking if Noah Wilson's memberships:

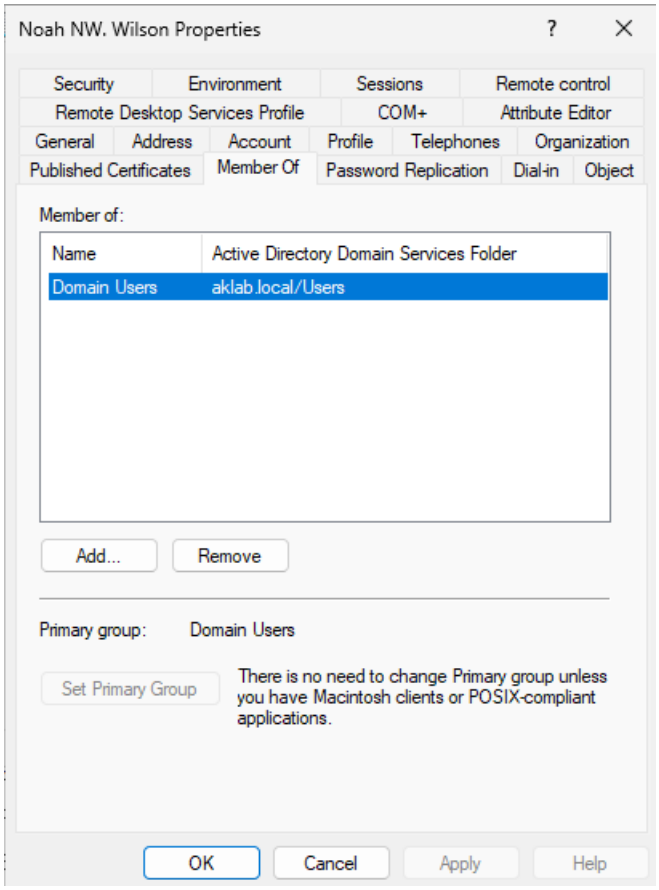

Figure 2: Noah NW. Wilson Properties

Noah is not a member of any other group than Domain Users, so there is no need to take account of those things but because of security reasons, it is better to reset the password on the Active Directory and then disable the account.

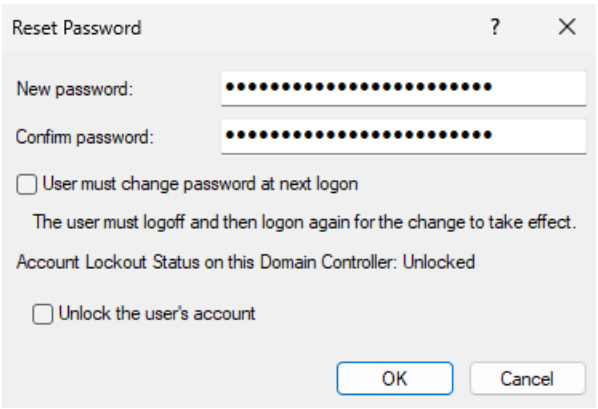

Figure 3: Resetting the password

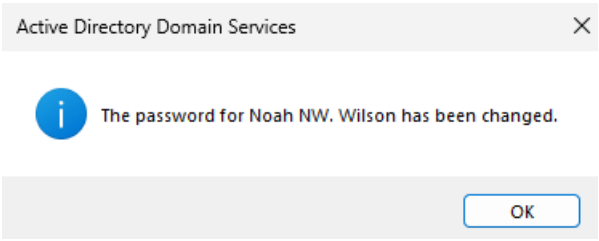

Figure 4: The password is reset

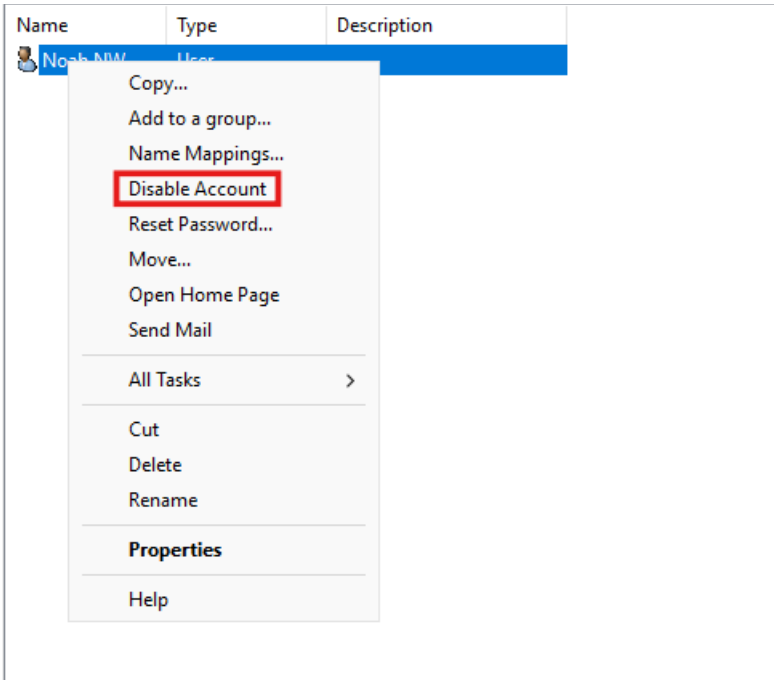

Figure 5: Disabling the account

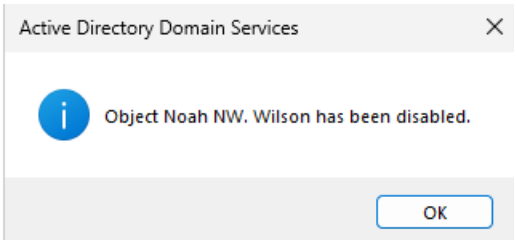

Figure 6: The account is disabled

5. Validation

Verifying if the account is disabled by trying to log in remotely:

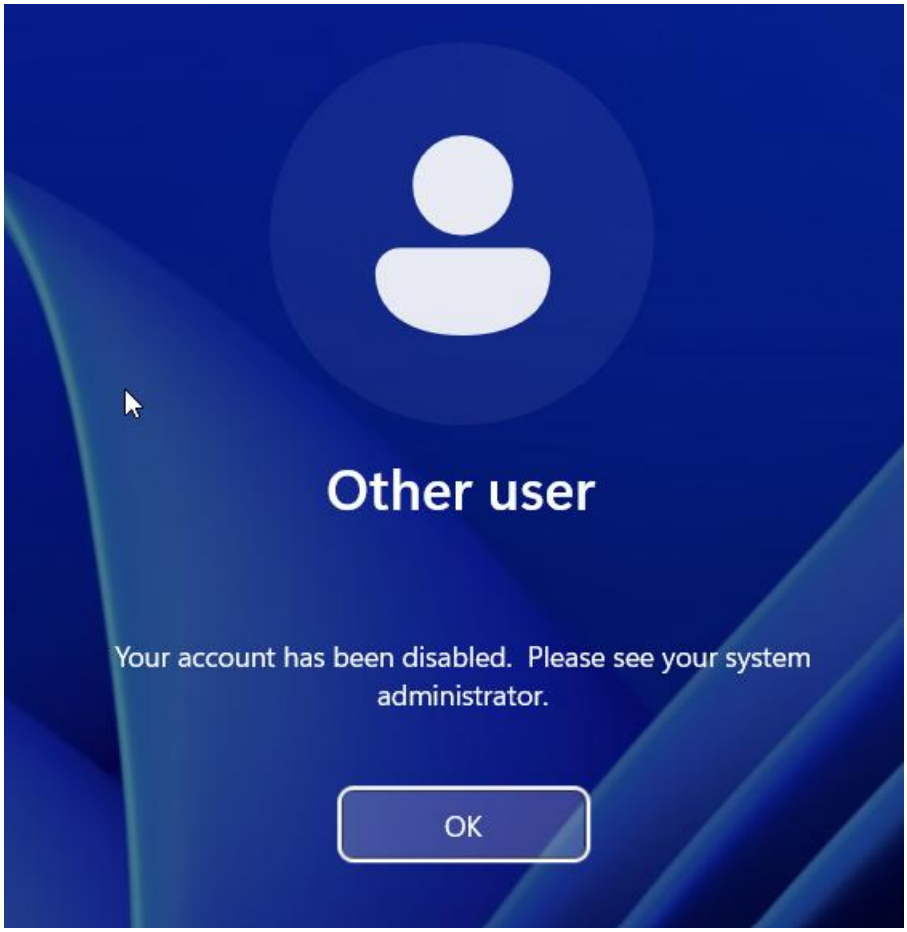

Figure 7: Verified that the account is disabled

Even if somebody tries to log in to the account, the account is successfully disabled.
