Issue:

Configure File Version History and Recovery for Shared Folders

The IT department requires a file version recovery solution for shared folders hosted on DC01 to help employees recover previous versions of documents after accidental modifications or deletions.

Environment: DC01 (domain controller) and CLIENT01 (Windows client)

1. Issue Description

Configure Windows Server Shadow Copies for the volume hosting CompanyShare, establish an appropriate snapshot schedule, and verify that authorized users can access previous file versions from CLIENT01.

2. Environment

- User account: AKLAB\Administrator
- Shared resource: \\DC01\CompanyShare

3. Resolution

Check the volume containing CompanyShare:

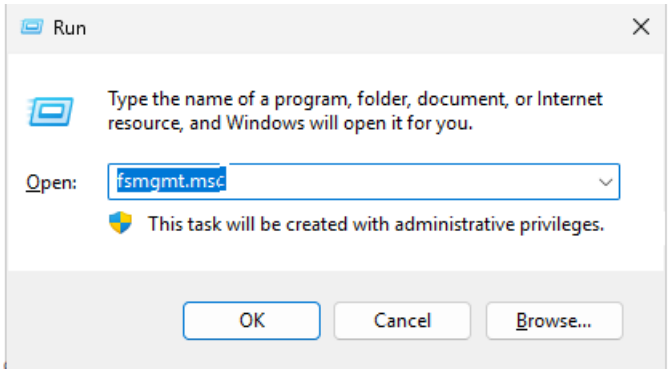

Figure 1: Running this command on Win + R

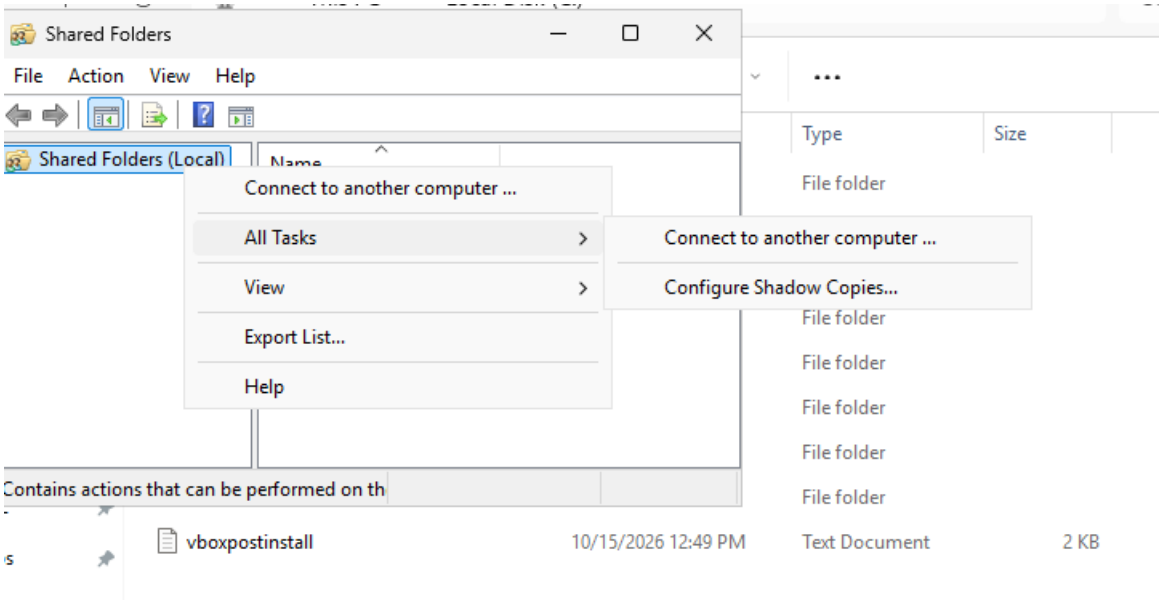

Figure 2: Configuring Shadow Copies

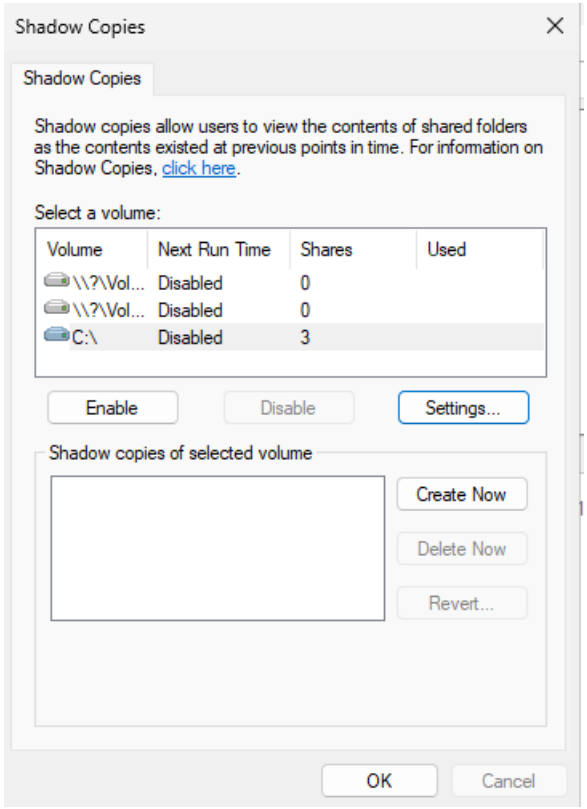

Figure 3: Shadow Copies Settings

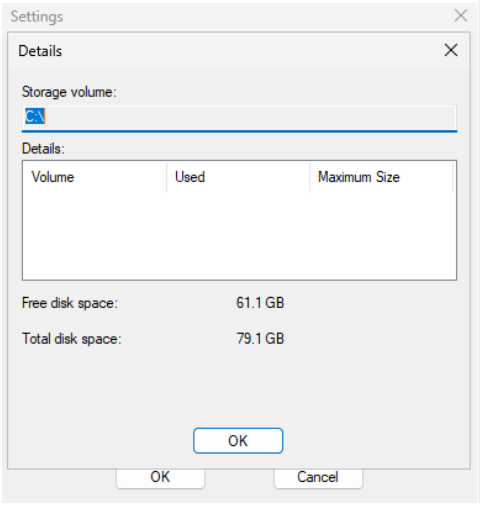

Figure 4: Available space is 61.1GB

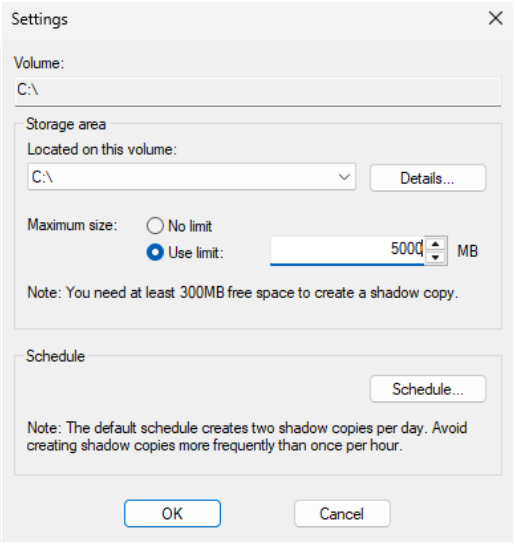

Figure 5: Applying the limits

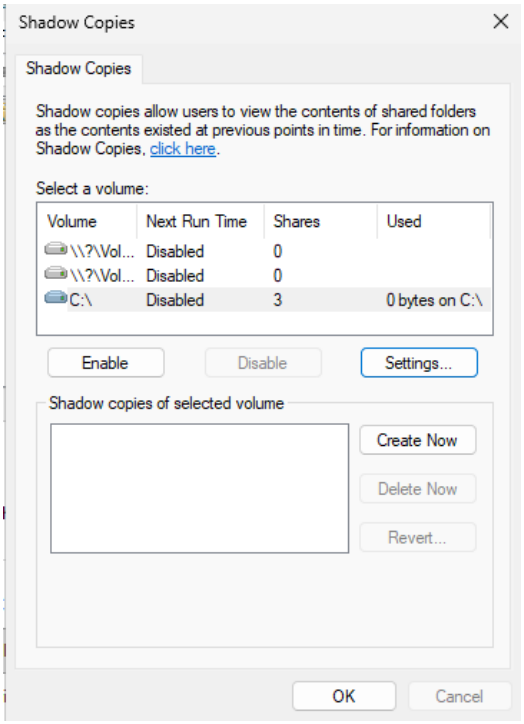

Figure 6: Enabling the shadow copies after the settings

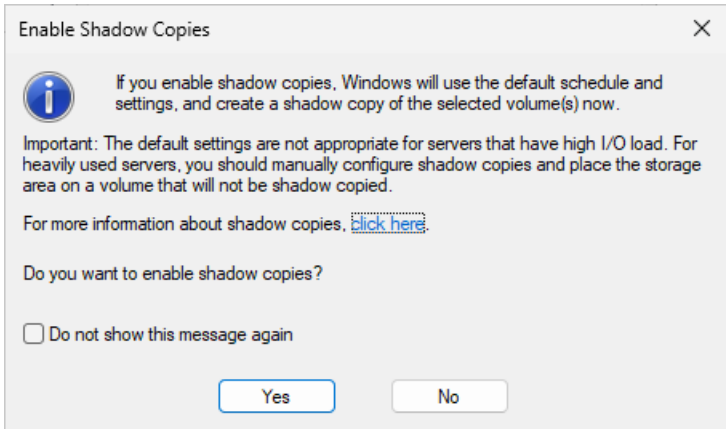

Figure 7: Checking the confirmation box

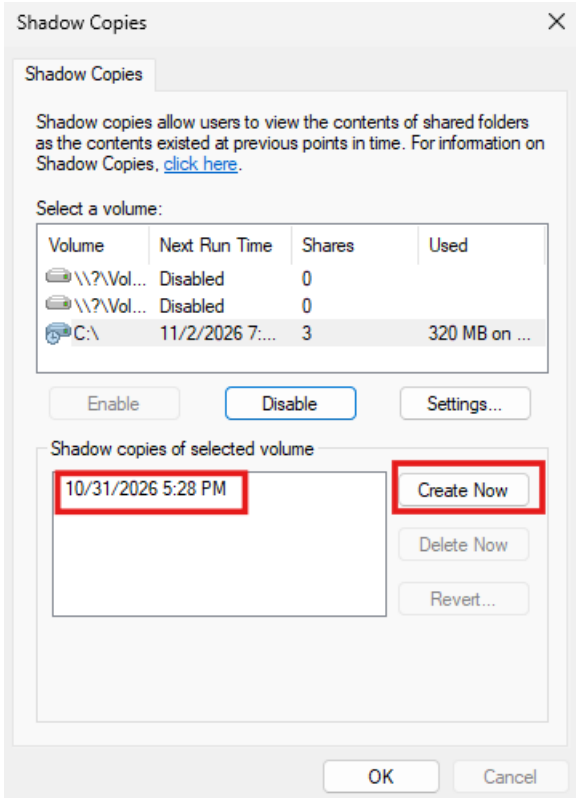

Figure 8: A shadow copy can be seen

4. Validation

Let's verify:

Creating a test document:

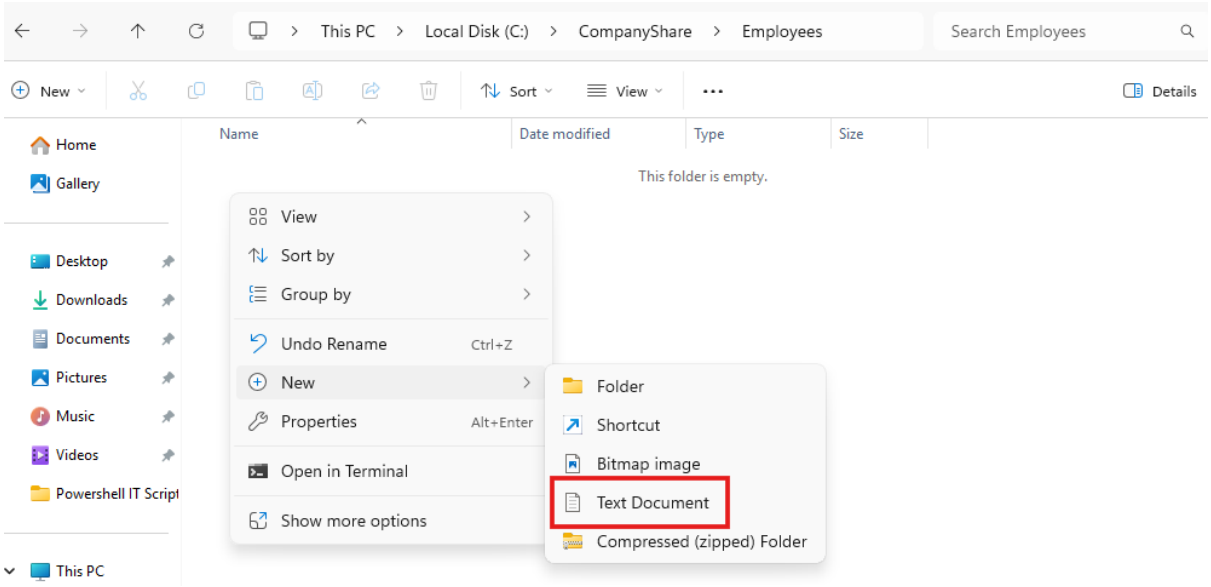

Figure 9: Creating a test file

Figure 10: A test file is created

This file contains some random information:

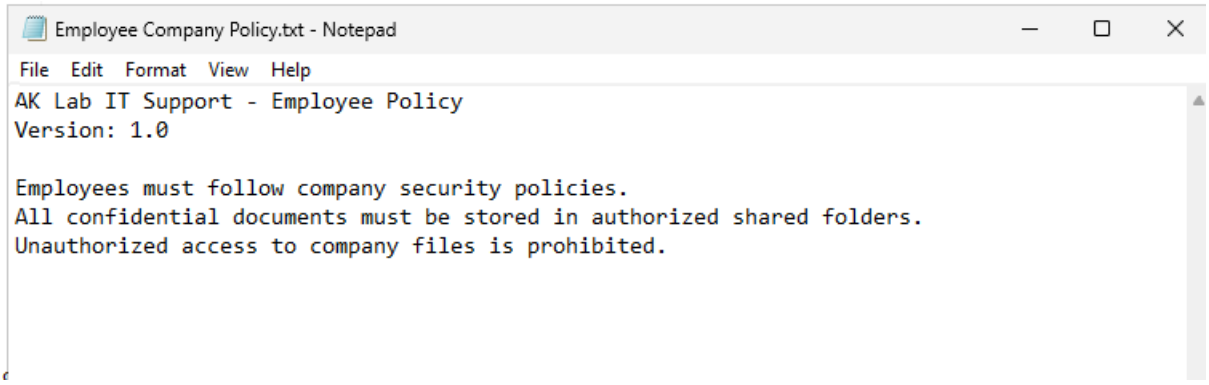

Figure 11: Information inside the file

Let’s create a new shadow copy now:

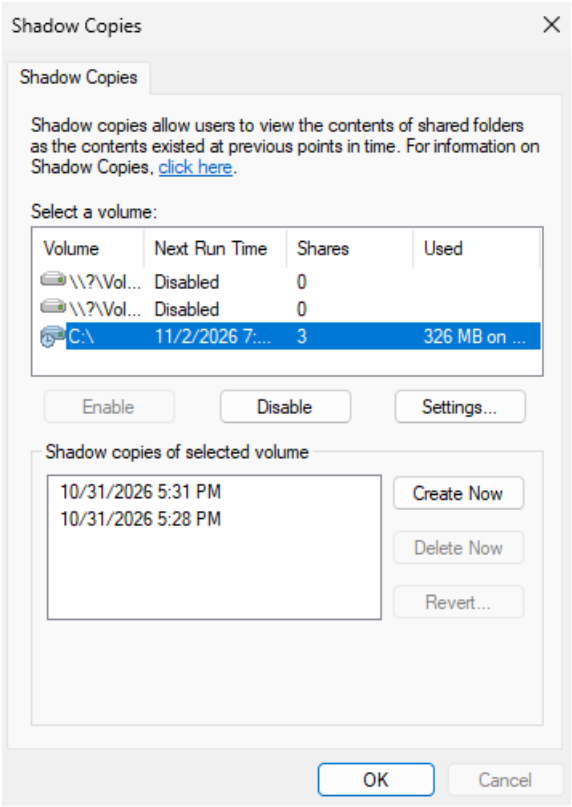

Figure 12: Creating a new shadow copy

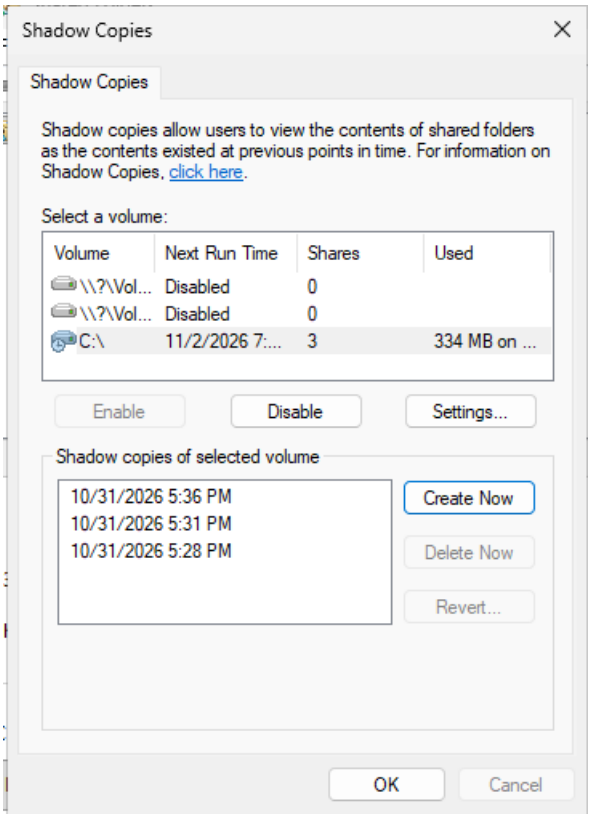

Figure 13: A new shadow copy is created

As per the logs, Jamie Taylor recently edited the file, and this what the file looks like now:

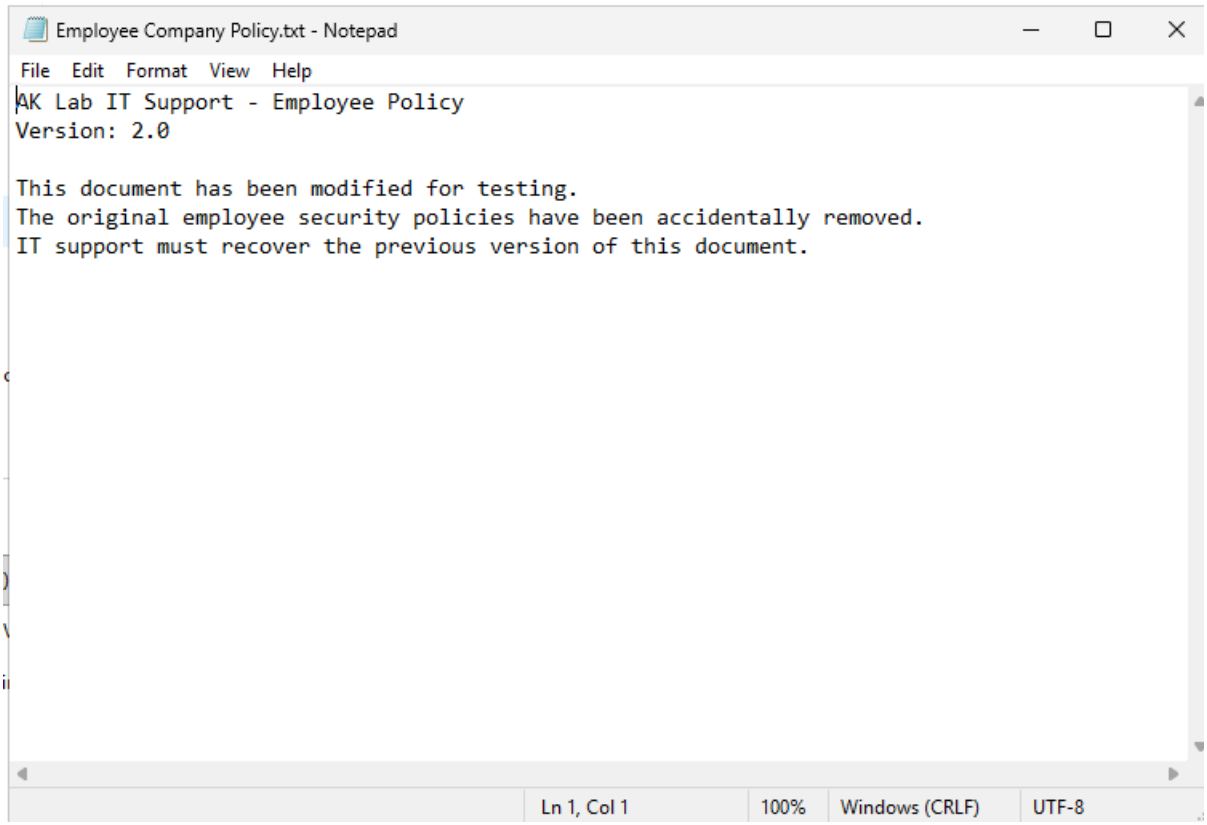

Figure 14: Updated file

Let's check if we will be available to retrieve the version 1.0 of this file:

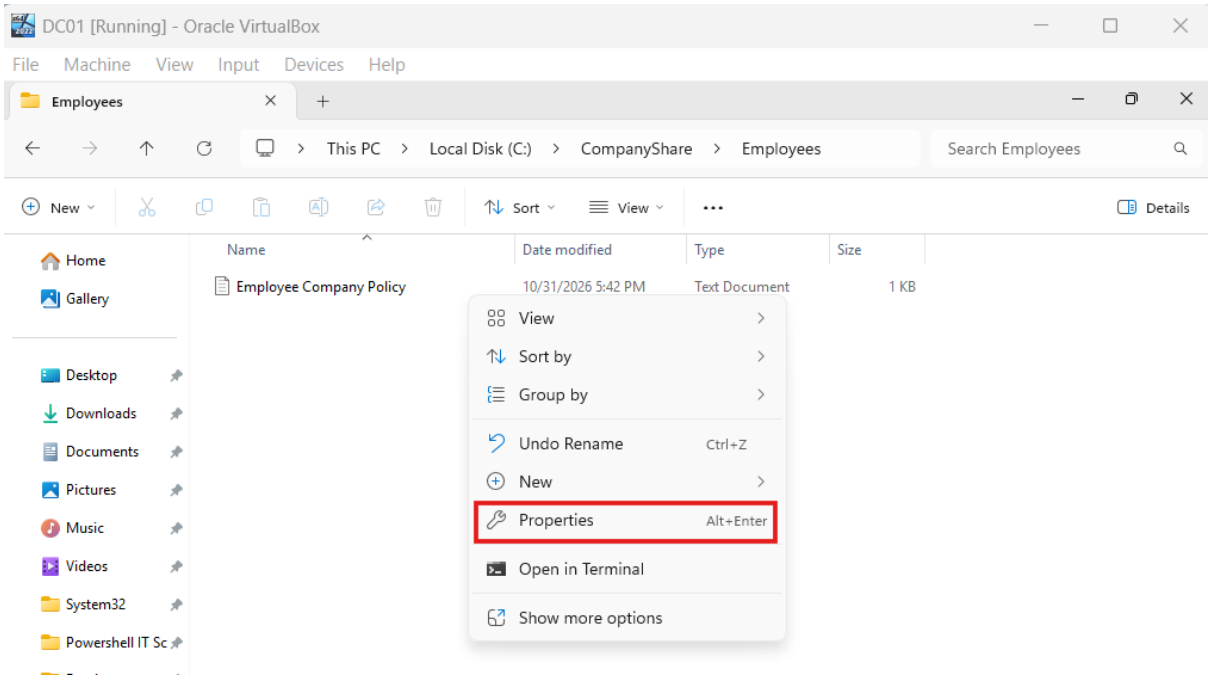

Figure 15: Checking the properties of the file

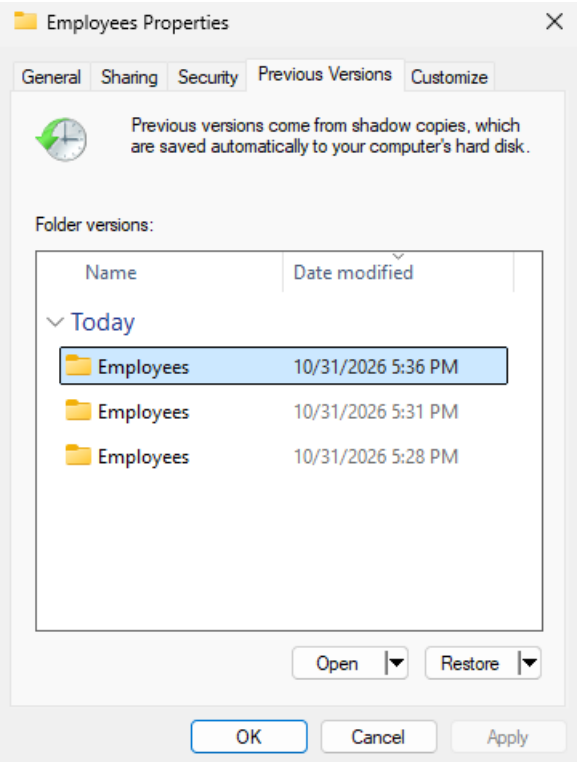

Figure 16: Checking previous versions

After opening the Employees version created at 5:36 PM, we are able to find the previous version of the file:

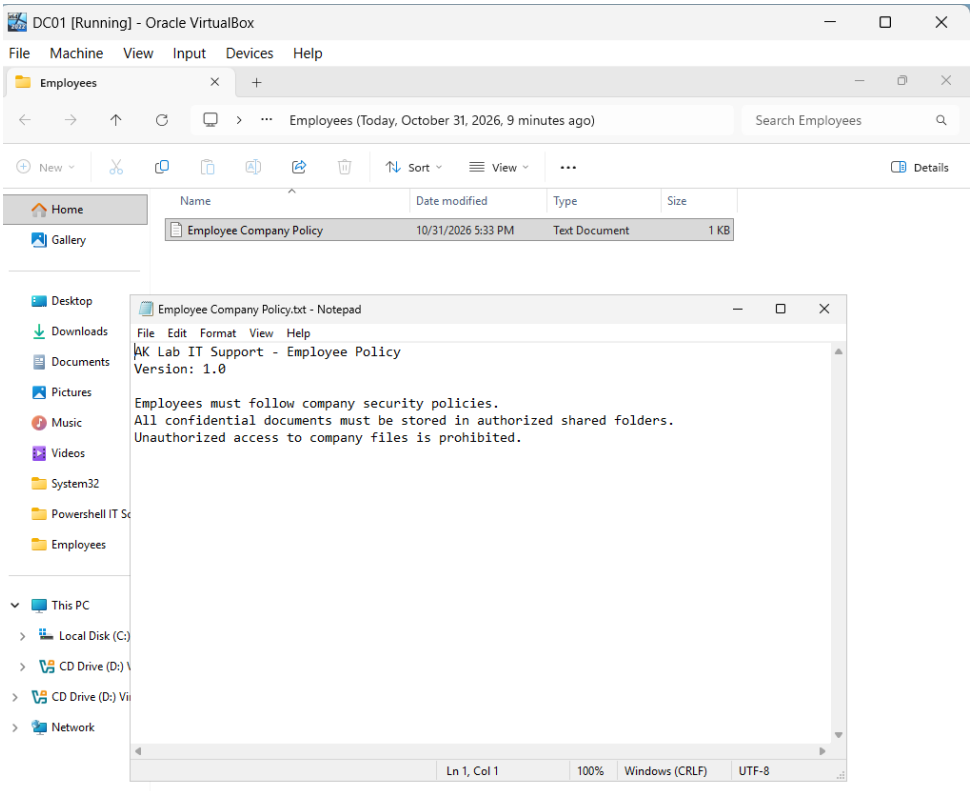

Figure 17: Version 1.0 is found

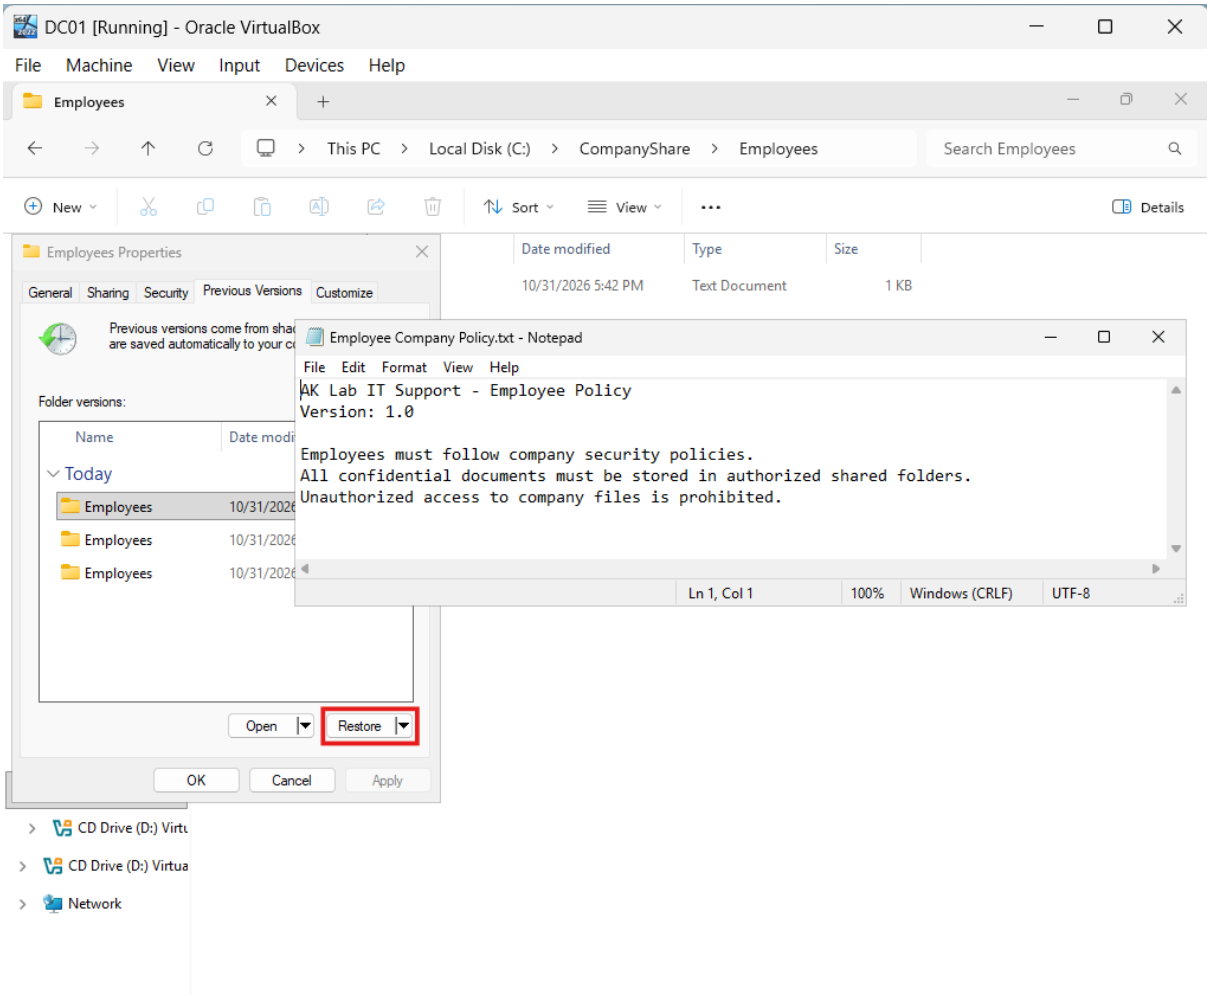

Figure 18: The file can be restored

Let's try to restore the file

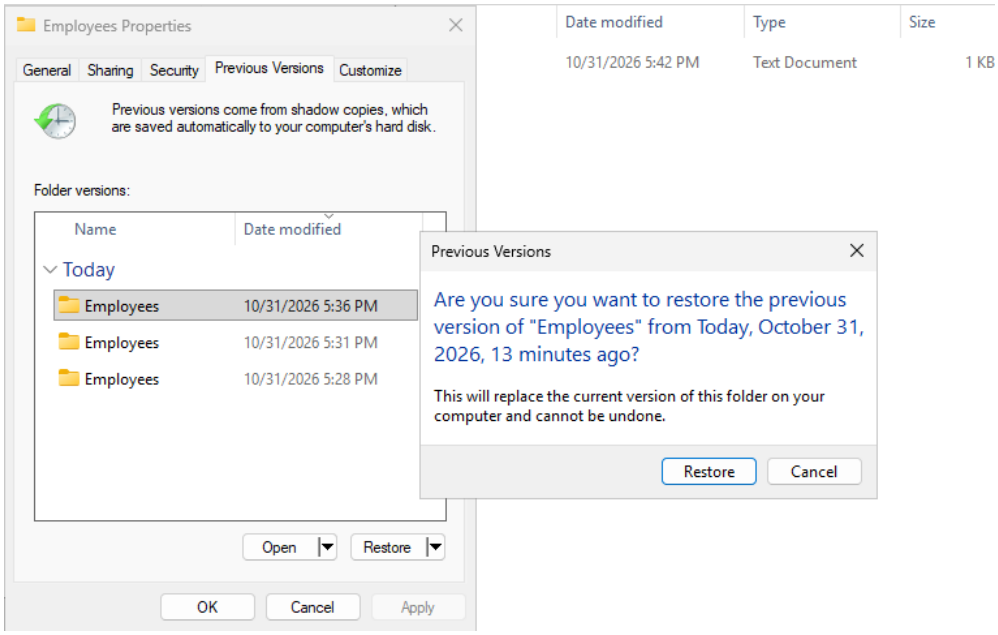

Figure 19: Confirming the restore

Let’s just try to restore the file instead of the whole folder

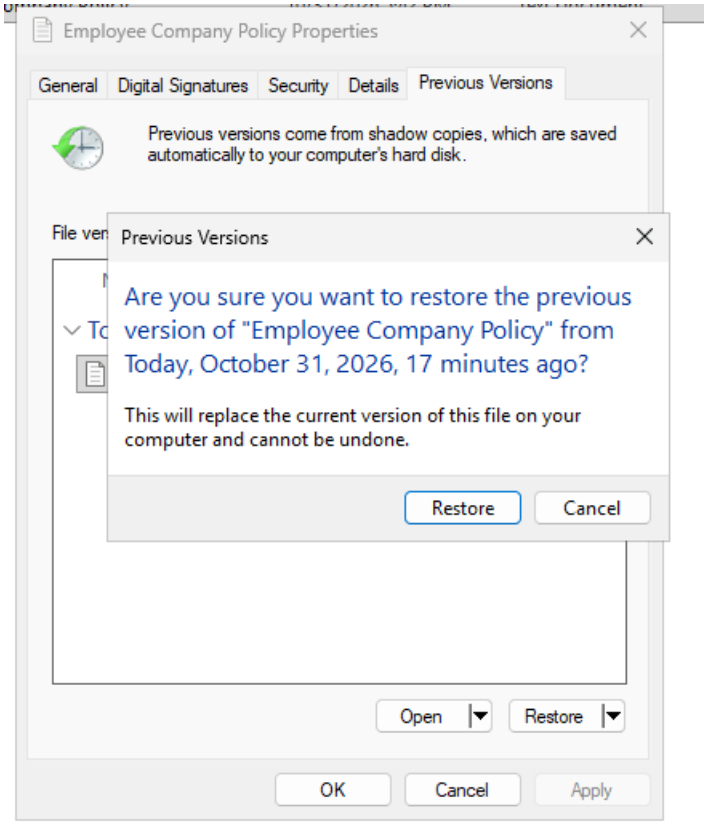

Figure 20: Restoring the file

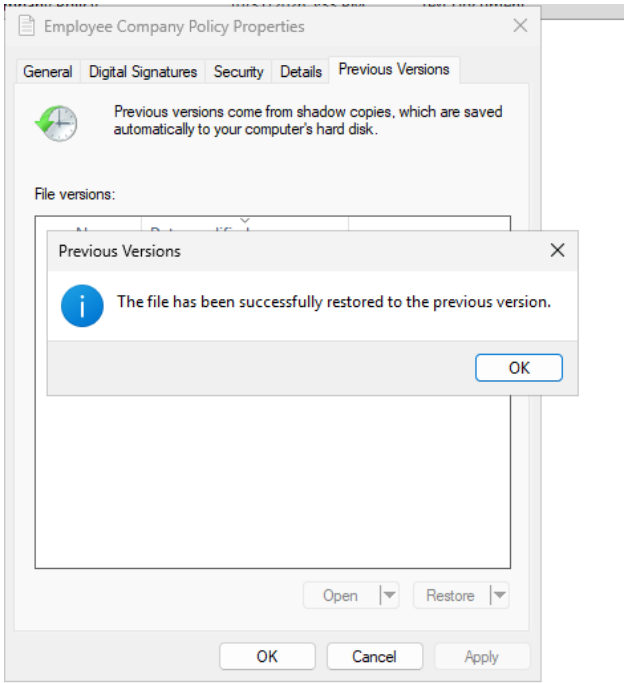

Figure 21: The file has been successfully restored

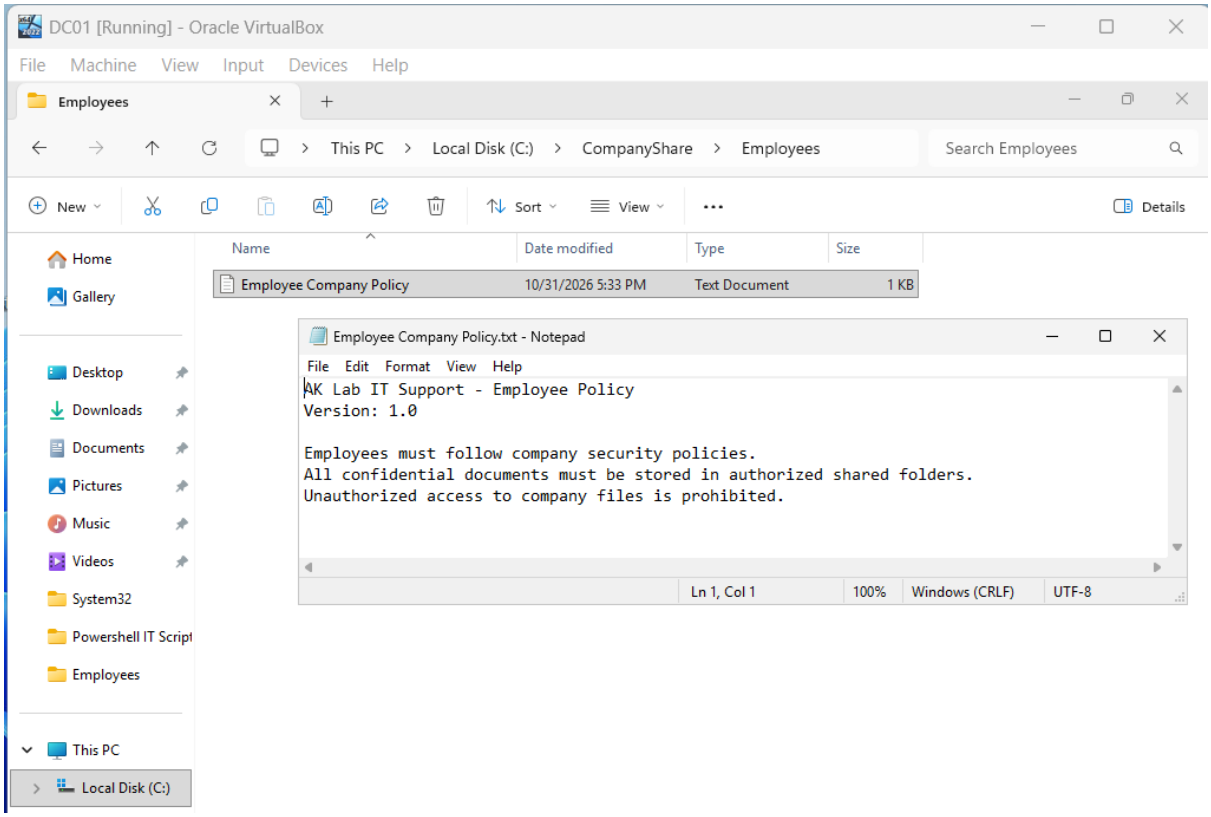

Figure 22: The file is restores and the contents are from version 1.0

Ticket Resolved!
